Have fun. ===== Burning Wheel Start, or Wipe and Reinstall: - Go to Settings-Security- Device Storage- and wipe the apps. - When that is done, open the Play Store and install the latest APK's from the playstore. - One of the APK's is for "Unknown Sources" - Once that is done, Install "Antutu HD". - Go to /sdcard/downloaded/ and install "Burning Wheel" (or any other Apk file) - If you just want to play the game right now, you can delete "antutu" & "burnning wheel" folders after installing your APK's, and then you can play the game right now. If you have the previous version of the game: - Put the files from the previous version's.apk folder (in the /sdcard/downloaded/ folder) into the Burning Wheel folder. - Then open the game and it should find the files & play normally. WARNING! Do not put files into the /sdcard/Download/ folder! You can also do this by putting all the folders from the /sdcard/Download/ folder into the /sdcard/downloaded/ folder PS: If you like this app, please take a moment and rate it on Google Play.
